McCone

Havana has no specific situation. Cuba punctuated with caves. Some caves very large - close to IL-28 field - We have reported caves used for armaments & communications personnel - Dept. of State security just west of Havana. We cannot dismiss this lightly. Caves could be used to secrete missiles - IRBM sites 2 1/2 to 3 wks. build - detect 6 or 7 wks. before operationable. MRBM 3 to 4 wks. operational capability. 2 wks. before we could detect.

McNamara

As discussed with you, Mr. Pres. earlier, U-2 going in today - 14 sorties
4 against possible submarine base -
7 Priorities - Nov. 15 to 30 McCone before they take missiles out except deck loading - will not deck load - will store for 2 wks. or more to see where they are stored.

McNamara Priorities

- (1) IL-28
 - (2) Havana - across harbor - find most of this equipment in port area.
- Rusk says Havana no good for today because Mikoyan in Havana. McCone says our people haven't seen Castro end of island since Oct. 23 - we think whole eastern end of island for immediate photography. Pres. want photographs for tomorrow of all missile sites - Bundy says have not seen all.

Taylor says -

- Where moved?
- How much has moved?
- Must look at ports frequently

Test ban discussion. Pres. 'Do we have to test in '63?' In order to develop
50 megaton weapons in 10,000 lb. size would have to test in '63. Should be
done in May. Some could be done underground. Rusk against time limit
to test of weapons - we keep pressure on Soviet Union by not saying we will
